PROCEDURES

Decontamination wipes – Work instruction

The [Work instruction – Decontamination wipes](#) has been published on the [Recommended practices](#) toolkit on the intranet.

Key points

This instruction applies to all FRNSW operational personnel where fireground decontamination is required.

Wipes are designed to remove the products of combustion from the skin after exposure during structure or bushfires. Seek advice from Hazmat Technicians or the Scientific Officer when hazmat decontamination is required.

Wipes are intended for use only on the skin. They are not suitable for decontaminating equipment.

Each appliance should be equipped with 2 packets per crew member (ie, 8 per pumper, 4 per tanker, heavy rescue or ladder platform etc).

Decontamination wipes are available through ESCAT 11124 for a pack of 12, or 11125 for a box of 24 packs. Wipes should be stored on the appliance in the WEPRO Kit.

Who needs to read the policy?

This procedure needs to be read by all staff including all firefighters and all Station Commanders.

Contact Officer: Superintendent Greg Wright, Manager Hazmat and Counter-Terrorism on 0418 169 629
